

Clean Air. Safer Workplaces.

**We help you protect what matters—your team,
your compliance, and your bottom line**

Take control of your air quality with Airflow Systems, industry-leading solutions engineered for dust, mist, fume, and exhaust removal. Designed to meet your specific in-plant needs, our advanced filtration systems deliver the performance, productivity, and payback your operation demands.

REMOVING DUST, MIST, FUMES, & SMOKE SINCE 1985

Mist Collectors

Remove mist, smoke, and fine particles at the source with our advanced Mist Plus® filtration and application-specific mist collectors that deliver cleaner air and longer filter life.

Air Cleaners

Clean airborne contaminants with our high-capacity and versatile air cleaners tailored to a wide range of industrial and commercial applications.

Portable Collectors

Get powerful, on-the-go filtration with compact, durable portable collectors that adapt to various tasks and environments without sacrificing performance.

Dust Collectors

Collect dust using our high-efficiency filtration, rugged, and customizable dust collectors designed for specific dust types and industrial environments.

Collection Arms

Capture fumes and dust at the source with our durable, adjustable collection arms that integrate seamlessly with filtration systems for reliable air quality control.

High Vacuum

Get powerful source capture of heavy fumes, dust, and debris with high static pressure performance and rugged construction built for demanding industrial applications.

Dust Booths

Control dust in open work environments with modular, self-contained dust booths and built-in filtration that eliminate the need for external ducting.

Paint/Fume Booths

Contain and filter airborne contaminants with modular and self-contained booths that eliminate the need for external ductwork while ensuring cleaner, safer workspaces.

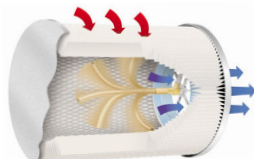

Downdraft Tables

Downdraft tables extract dust and fumes through a rugged, ergonomic work surface with integrated filtration and customizable configurations for specialized industrial applications.

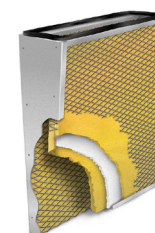

Vehicle Exhaust

Remove harmful emissions at the source with our flexible configurations and durable components designed to meet the demands of various environments.

Vibra-Pulse® Dust Filter Cleaning

Compressed air and a high-pressure impactor hose restore filters to full capacity, while broad pleat spacing increases dirt-holding capacity and reduces cleaning and replacement frequency.

Mist-Plus® Oil Mist Filters

Multi-layer glass media and a gravity-assisted design efficiently capture and drain fine mist particles, delivering longer filter life, fewer replacements, and lower maintenance.
